

Rolls Past The Competition.

<p align="center">RETRAX[™]</p> <p align="center">Product Features and Benefits</p>	<p align="center">VS.</p>	<p align="center"><u>The Competition</u></p> <p align="center">Product Differences</p>
<p align="center">One Piece Polycarbonate (LEXAN®) Design</p> <p>A durable thermoplastic commonly known as LEXAN® that is UV treated for protection from the sun.</p>		<p align="center">Vinyl</p> <p>Vinyl glued or stapled to aluminum slats.</p>
<p align="center">Strength</p> <p>The cover is reinforced with up to 20 tempered aluminum support beams embedded every 4 3/4", which will hold 200 lbs. and can easily support heavy snow loads. The cover is strong enough to stand on (not recommended).</p>		<p align="center">Strength</p> <p>The cover will withstand a concentrated load of about 120 pounds. A light snow load is tolerated.</p>
<p align="center">Sealed Ball-bearing Rollers</p> <p>Forty (40) sealed ball-bearing rollers mounted onto each end of the aluminum support beams allow the cover to retract or close easily without the use of springs or any kind of mechanism. Anti-bind ball-bearings mounted horizontally prevent the cover from binding as it is opened or closed.</p>		<p align="center">Wear Strip</p> <p>Top and bottom rail wear strips.</p>
<p align="center">Spiral Track Storage Canister</p> <p>Unique spiral track storage canister that prevents the cover from rubbing on itself as it retracts, this eliminates wear-and-tear on the cover. No moving parts to jam, freeze or fail.</p>		<p align="center">Spring Loaded Drum</p> <p>Cover rolls up on top of itself on a spring loaded drum similar to a window shade.</p>
<p align="center">Lockable In Any Position Along The Rail</p> <p>Cover can be latched or key locked in any position along the rail. Tailgate works independently of the rolling cover.</p>		<p align="center">Locking Positions Every 12"</p> <p>Intermittent locking positions every 12 inches. Tailgate works independently of the rolling cover.</p>
<p align="center">Lock Handle</p> <p>The flush-mounted lock handle, located at the rear on the drivers side, provides easy access when opening and closing the cover.</p>		<p align="center">Pull Strap</p> <p>Reach to the center of the cover and grab a tow strap, walk to the back of the truck and pull the cover back</p>
<p align="center">Tailgate Area</p> <p>The RETRAX[™] bed cover overlaps the top of the tailgate utilizing an automotive grade weather strip seal.</p>		<p align="center">Tailgate Area</p> <p>The cover meets up with the inside face of the tailgate. Water runs down the inside face of the tailgate.</p>
<p align="center">Weather Protection</p> <p>The patented RETRAX[™] low-profile design uses a front cover that is flush with the rolling cover; this streamlines the overall appearance and provides a firm, dependable seal to help keep the bed dry. This design incorporates automotive grade weather strip to keep water, snow, ice and dust out of the bed.</p>		<p align="center">Weather Protection</p> <p>Water is channeled to the rails and canister. The water must try to pass through 2 small drain tubes to exit the bed.</p>
<p align="center">Maintenance</p> <p>The RETRAX[™] is maintenance free. Wash and wax the cover like you would wash and wax your truck.</p>		<p align="center">Maintenance</p> <p>Requires treatment with a vinyl protectant. Should be applied each time you wash your truck.</p>
